It has been proven repeatedly that the cause for "backward" school children is very often defective vision—the child having difficulty in seeing the blackboard, experiences embarrassment and headaches, aching eyes, etc.

Whether your boy or girl is backward or not don't you think it would be a good idea to have his or her eyes examined and KNOW the condition of the vision and whether glasses would be of any aid?

Drop in and see us about your child's eyes—it's a good policy.
